Smart Wallets

SMART WALLET FOR SMART PEOPLE

ÖGON: THE CREATOR OF ALUMINIUM WALLET

Founded in 2004 in France, ÖGON DESIGNS invented the concept of the **smart wallet**, launching the very first designer wallet made of aluminium.

The arrival of ÖGON, revolutionized the leather goods market and our iconic model, the Stockholm rapidly became a **best-seller** and **international success**.

Since ÖGON DESIGNS has continued to produce **innovative wallets** with a unique take on the traditional wallet.

We offer wallets to meet everyone's needs with **quality and craftsmanship** that combine **style and functionality**.

ERIC BERTHES

Since 2012, ÖGON's visual identity and new collections have been handed over to the **famous French designer** Eric Berthes.

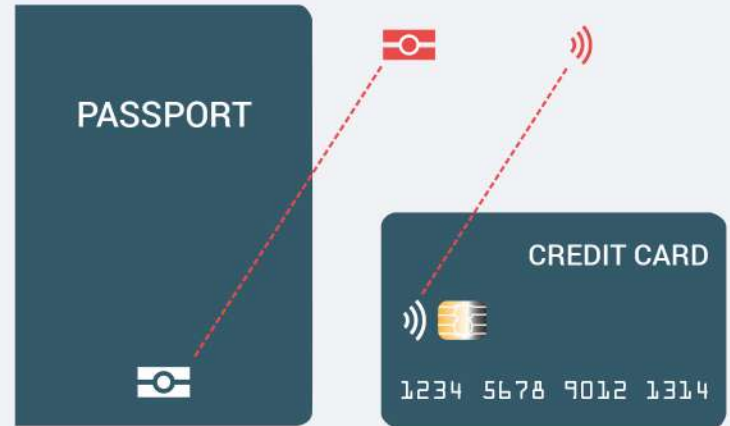

The talented designer has already worked for some of the **most renowned brands** such as Bollinger, Sonia Rykiel, Corum, and Ruinart.

He created for ÖGON DESIGNS, the Quilted Collection, the **first wallets ever made with quilted aluminium**.

WHAT IS RFID AND WHY YOU NEED TO BE PROTECTED ?

More and more credit cards and passports are outfitted with RFID (Radio Frequency IDentification) chips.

This technology is what makes cards capable of contactless payment.

On the downside, individuals who have RFID readers can extract sensitive information from credit cards or passports without the owner even knowing that they were victimized.

This phenomenon is known as **digital pick pocketing**.

If you own a card with a RFID chip that puts you at risk of fraud and identity theft, it is still possible to reduce the risk by using a **RFID protected wallet**.
